

Pl. 4/1: BK2017_o6 by the end of the 2017 excavation. Photos and of 3D model by T. Votroubeková.

Pl. 4/2: Cup on feet excavated in Bobolanger – typical vessel form of the Late Bronze Age (Sapalli Culture). This particular vessel was recomposed from sherds found throughout the entire stratigraphy of the trench BBLo3 including in the backfill of the graves, evidencing clearly the disturbance of settlement layers by the later graves (photo by T. Votroubeková, reconstruction by A. Augustinová).
